Profile Audit

Your profile currently feels like a personal page with hints of musical talent, but it doesn't immediately establish you as an R&B; artist. A new visitor might be unsure if you're pursuing music seriously due to a lack of a clear visual identity and consistent, high-quality performance content. To convert viewers into fans, we need to build a cohesive brand that showcases your voice, personality, and artistry with intention.

Content Types

- Raw Acoustic Covers: One-take, vertical videos of you singing covers of trending or classic R&B; songs. Focus on clean audio and emotive performance.
- Songwriter's Notebook: Carousel posts or short Reels showing your creative process. This could be a screenshot of lyrics from your notes app, a screen recording of a beat you're working on, or you explaining the story behind one line.
- Get To Know The Artist: Blend trends with your personality. Examples: A 'Get Ready With Me' Reel set to your favorite R&B; playlist, a 'Top 5 R&B; albums that changed my life' carousel, or a post sharing your non-music hobbies to build a personal connection.
- Interactive Stories: Use polls, quizzes, and question stickers daily to engage your audience. Ask 'What should I cover next?', 'Finish this D'Angelo lyric...', or host a Q&A; about your musical journey.

Frequency: 4-5 feed posts per week (3 Reels, 1-2 Carousels), with 5-7 unique Story slides daily.

Best Times: Weekdays 6 PM - 9 PM EST; Weekends 1 PM - 4 PM EST. Analyze your own Insights after 2 weeks to refine.
